

# First-of-its-kind **lump-sum** earthquake insurance

**Jumpstart pays \$10,000 right away after a big quake, to use however you need to recover.**

If there's one thing the pandemic has taught us, it's to expect the unexpected. And the next big earthquake in California will be no exception.

The USGS estimates a **99%** chance of a M6.7 or larger earthquake within California in the next 30 years.

## How it Works

- Payment is triggered by transparent, public data from USGS ShakeMaps.
- Payment zone is roughly the "red zone" of the ShakeMap, approx. M6.0 or larger.
- No deductible or paperwork.
- Funds can be used for any purpose. No damage necessary.
- Average price of \$21 per month, varies by ZIP code.

“Jumpstart keeps everything we love about insurance – the sense of security and financial support when we need it most – while eliminating the hassles, delays and disputes.

– Frank, Jumpstart customer since 2019
